

**Figure 6**

Figure 6 consists of two panels, (a) and (b), showing the results of a sensitivity analysis. Panel (a) displays the effect of the number of iterations on the mean value of the estimated parameters. The x-axis represents the number of iterations from 0 to 100,000, and the y-axis represents the mean value of the estimated parameters from 0 to 1.0. The plot shows a series of horizontal bars representing the mean values at different iteration points. Panel (b) displays the effect of the number of iterations on the standard deviation of the estimated parameters. The x-axis represents the number of iterations from 0 to 100,000, and the y-axis represents the standard deviation of the estimated parameters from 0 to 1.0. The plot shows a series of horizontal bars representing the standard deviations at different iteration points.
